Email: sensei.mobile.dev@gmail.com See more WhatsApp Messenger has become an instant messaging app par excellence used by millions of users around the world to communicate with a lot of people through it. This app has significantly changed the text function of mobile devices, and in this new era, when an image is worth a thousand words, it is important to have a good pack of stickers that helps us express what we mean. That's why we decided to make a list of the best for Android users that you can get in the Play Store. We will also teach you how to make your stickers more fun. List of the best Whatsapp Messenger sticker packages that you can download on Android You must first keep in mind that WhatsApp does not install stickers directly into your app, but to access them, we need to install applications that contain these sticker packs. This means that if you remove this app, we will not have access to instant messaging service stickers. Below we will show you some of the best apps with the most fabulous and fashionable WhatsApp Messenger sticker packages that you can download to your Android device: Emoticons Sticker Pack for WhatsApp Do you like emoji? We know, so we recommended this great app, which contains several sticker packs based on loud emoticons, so that you can share with your friends the most fun expressions. Super stickers WASTickerApps 2019 This app offers us a series of pretty cool stickers that you can share with your WhatsApp contacts. Video games, animals, TV series, emoticons and more. This app is great and we can download it from Android from the Google Play Store. How to make your stickers and stickers fully customized on Whatsapp? Yes, the full list of programs that contain sticker packs is very good, but ... who wouldn't want to create their own completely customized stickers and stickers to share with friends and have a good time? You're really tired of searching whatsapp for its development features and, of course, you did not find it, because the program did not include it in its interface. However, there are already tools that will allow you to create whatsapp for free. Below you will be able to know the process to do this: Image formatting The first thing to keep in mind is that the program we use only supports .webp and .png files that must be 512x512 pixels in size, so you'll need to use a certain video editor to adjust the size and change the format. The minimum number of images for creating a sticker pack is three files that match the format and size described above. These files must be in the same mobile folder. When downloading the app, you'll first need to go to Google Play to download the Personal Stickers of the WhatsApp app. This will be a tool that will allow you to convert images from your mobile to stickers. At the launch of the app, When we download and install personal WhatsApp stickers, we'll launch it. It will automatically detect the folder where you have images, and you will also have the option to add them manually to create a package. It should be noted that if the program asks for our permission to access our images, we need to select the Option Allow. When you see the group of images you want to add to WhatsApp, just select Add. Sending our stickers When you complete the previous step, WhatsApp can already have stickers that we've added fully customized to share with your friends at any time. If you're left with any questions, leave them in the comments, we'll answer you as soon as possible, and it's definitely going to help more members of the community. Thanks! 😊 ☺
